

Operation Ouch Book Review By Flynn Sargeant Year 2

This book was written by two men called: Dr Chris and Dr Xand Van Tulleken. It is called Operation Ouch the HuManual. It is about your body and gives you information about your body.

In the book there is lots of stuff about the body. The interesting facts are very useful. There are many experiments, they are really fun. I like the magazines, games and jokes.

There is nothing I don't like about this book

I have learnt many things from this book like the Human Prototypes, like the Australopithecus Afarensis , Homo Habilis, Homo Erectus, Homo Neanderthalensis and Homo Sapiens – You! The Doctors have met people with strange bodys for example Delia Du Sol who is a contortionist which means (someone who is very flexible, from the Flynnntionary).

You should buy this book because it has disgusting, fun and weird stuff inside.

The best thing is all the jokes and facts, here is a joke:

Q What do you call a pig with no eyes?

I don't know

A A pg
